PRIVATE COMMERCIAL AND BUSINESS SCHOOLS, 1924-25

This report contains the statistics of 739 private commercial and business schools for 1924-25, and of 20 public commercial and business high schools for the same year.

There has been a considerable decrease since 1920, both in the number of private schools reporting and in the enrollment. For that year 903 institutions had an enrollment of 336,032. For 1925 the 739 schools had an enrollment of 188,363. While data for the two periods are not quite comparable, because of incomplete returns each time, the differences are no doubt representative of the whole group. The reduction in number of day pupils is about 40 per cent and in night pupils 51 per cent. In 1920 the enrollment in 258 schools was 100,682, and in 1925 the same schools enrolled 85,289, a decrease of 15 per cent. At least 275 schools reporting in 1920 have gone out of business since that time. About 375 new schools sent in a report in 1925.

With the decrease in total enrollments, the enrollments in bookkeeping, stenographic, combined bookkeeping and stenographic, accounting, wire telegraphic, and salesmanship courses have decreased also, the rates of decrease ranging from 32 per cent to 61 per cent. The greatest decrease is in the number taking wireless telegraphy, 67 per cent. There is an increase of 3 per cent since 1920 in the number enrolled in secretarial courses.

The 20 public commercial and business high schools enrolled 35,120 pupils. In bookkeeping courses 12,535 were enrolled; 16,004 in stenographic courses; 10,771 in combined courses; 969 in accounting courses; 1,670 in secretarial courses; 1,015 in salesmanship courses; 284 in courses of business administration; and 1,726 in courses of instruction in the operation of computing and bookkeeping machines. Other public and private high schools offer commercial subjects, and still others have commercial departments. In 1924 a total of 3,742 public high schools had 430,975 enrolled in commercial courses, and 740 private high schools enrolled 11,941 in commercial courses. In 1916 the enrollment in commercial courses in 2,844 public high schools was 243,185, and in 1918 it was 278,275 in 2,953 such schools. The reduction in the number enrolled in private commercial and business schools can be accounted for partly by this increase in enrollment in commercial courses in high schools. Data concerning the 20 public commercial and business high schools are given in Tables 10 and 11 of this bulletin.

An attempt was made to find out what the private commercial and business schools were doing toward the training of teachers for commercial subjects. Of the schools reporting, 85 were offering

teacher-training courses and 346 men and 1,488 women were enrolled. Entrance requirements for teacher-training courses and length of course were reported for 81 schools. Of these schools, 5 have no entrance requirements, 6 require a common-school education, 69 require high-school graduation, and 1 offers courses only to college graduates. The average length of course is about 12 months. Of the 69 schools requiring high-school graduation for entrance, 27 have a course of less than 9 months, 23 have from 9 to 16 months, 17 have 17 to 24 months, and 2 have 4-year courses.

Machine-operating courses were pursued by 9,163 students in private commercial and business schools. These machines include those for computing, tabulating, posting, bookkeeping, duplicating, dictaphone work, addressing work, and for shorthand.

A distribution of students by courses, and classified by sex and State, is given in Tables 6 and 7, and enrollments by subject in Table 8. Table 9 gives certain details concerning the schools that reported in 1925.

Table 2 gives the entrance requirements for eight of the principal courses offered by private commercial and business schools. In each course there is a large number of schools with no specified educational requirements for entrance. The typical school requires its students to have completed the work of the elementary school course, and a number of schools require high-school graduation for entrance to each course. In Table 3 is a distribution of schools according to the amount of time required to complete the bookkeeping, stenographic, and combined courses. The average time in the day courses required to complete a bookkeeping course is 8 months, about 8 months for the stenographic course, and 12 months for both courses combined. In the night courses it takes 14 months to complete the separate courses and 22 months to complete the combined courses.

The data in Table 2 indicate that 109 schools have no entrance requirements for the stenographic course, while 394 require graduation from the common schools, 8 require one year of high school, 9 require two years, and 58 require graduation from high school. One school requires one year of college for entrance to the course in salesmanship, while 69 schools permit students who have graduated from an elementary school to enroll for the course. Other phases of the table reveal a wide variation in practices regarding entrance requirements.

Table 3 reveals fully as wide a range of practices regarding the number of months required for graduation from the day and from the night courses. Two schools require only 2 months for graduation from the bookkeeping course, while two other schools require 30 months; one requires 2 months for graduation from the stenographic course, while another requires 30 months. One school requires only

3 months to graduate from the combined stenographic and book-keeping course, while two schools require 30 months, or a period of time 10 times the length of the former.

The following tabulation is made so that the 446 schools shown in Table 2 as having no educational requirements may be compared with a like number requiring high-school graduation for entrance in the matter of length of course after entrance.

Number of months in the course

Course	Under 9 months		9 to 16 months		17 to 24 months		25 to 32 months
	High school	None	High school	None	High school	None	High school
Bookkeeping.....	22	71	10	35	1	1	1
Stenographic.....	43	80	12	28	2	1	1
Combined.....	13	17	30	62	2	5	1
Accountancy.....	32	12	41	11	25	0	2
Secretarial.....	48	17	61	27	4	1	0
Salesmanship.....	21	27	7	5	2	0	1
Business administration.....	25	7	20	5	9	0	0
Machine operation.....	8	25	1	8	0	0	0
Total.....	212	256	182	181	45	8	6

One school with no entrance requirements has a combined course of from 25 to 32 weeks, and one requiring high-school graduation for entrance has a secretarial course of more than 33 weeks in length. The average length of course for those requiring high-school graduation for entrance is a little over 10 months, while for those having no entrance requirements it is a little less than 9 months.

TABLE 1.—*Summary of statistics of all private commercial and business schools reporting, 1900 to 1925*
